

## Babcia's Corner

---

Oh my Babcia! What a thrifty grandmother she was! She had a corner of her house where little scraps of things turned magically in to just what you needed! Having grown up in a time where everything was in short supply except, as she always said, "hunger and drafts"—those were two things there was always more than you wanted!

Babcia had a way of not only making leftovers brilliant, but that woman could take the worst of hair days, shake the wrinkles off a kerchief or remnant of material and tie her hair up in a way that made me wonder why I didn't always see her as a spirited, lovely woman...instead of simply my grandmother.

I inherited her wiry, curly hair. But those kerchiefs give me a headache! It's that blasted knot at the back of my head and neck that does it. So I started thinking like Babcia...and improvising using the remaining pieces of yarn from Sitka, Totem Pole Park, and Japonski Island hats, I devised way to honor her resourceful nature and create a kerchief I could stylishly wear. You can use whatever leftovers you have on hand. This kerchief doesn't take much. But it uses perfectly good remaining yardage and makes my neck feel good and my hair look tidy while wearing it, even if I wear it off of center, which I do actually prefer! An added bonus: these make awesome gifts for friends! And work up fast!

Babcia would be proud of us both!
